

Short Sale VS. Foreclosure

Issues	Successful Short Sale	Foreclosure
Credit Score	A Short Sales effect can be as brief as 12 to 18 months . Only late payments on the mortgage will show. This can lower score as little as 50 points	A foreclosure will affect your credit score for over 3 years and can lower that score between 250 to 300 points
Credit History	A Short Sale MAY NOT be reported on a person's credit history	A Foreclosure will stay on a person's credit history for 10 years or more
Credit History	In some successful Short Sales it is possible to convince the lender to give up their right to pursue a deficiency judgment against the homeowner	In 100% of Foreclosures (except in those states where there is no deficiency protections in the law) the bank has the right to pursue a deficiency judgment
Credit History	A Short Sale is not to be reported on a credit report and therefore should not be a challenge to employment ²	Most employers require a credit check on all job applicants. Foreclosures are one of the most detrimental credit items for your credit report. This could affect employment
